

CITY OF MIDLAND
ADDENDUM
2022 – RFP for Airport Property

TO ALL BIDDERS ON THE SUBJECT BID:

ADDENDUM # 1

DATE: November 16, 2022

The following questions were raised by one or more of the proposers. The answers are provided as a matter of clarification for all proposers as follows:

Q1. Is there a current (2022 Market Study) for a potential hotel for this site? We believe this to be an important first step in the process of determining the right brand and size of the hotel.

A1. There has not been a Market Study, we have just had several requests for hotel and meeting space near the terminal from passengers as well as local businesses.

Q2. You requested a 3-star or higher hotel with restaurant, coffee shop and parking on-site. Is it your intention that this be a full-service hotel, i.e. Hilton vs. Hilton Garden Inn, Marriott vs. Marriott Courtyard, Hyatt vs. Hyatt Place, etc.?

A2. We would like to see a full-service hotel, but we will evaluate all the submittals and select what is best for the community.

Q3. Have any discussions been had about a potential Public/Private Partnership with the Airport or City and your selected developer? If so, will the Airport or City consider leasing the site instead of selling it outright to a developer?

A3. We have not had any discussion about Public/Private Partnerships. The Airport is limited by FAA Regulations on the length of leases, so it makes more sense to sell the land.

Q4. Have you considered developing this hotel adjacent to and connection to your terminal, perhaps on its Southern side?

A4. The Southern side of the terminal building is reserved for future terminal building expansion.

Q5. We did not find an actual RFP number for reference in the materials provided. When I called to inquire about an RFP number I was told that a number had not been assigned because it wasn't going through purchasing. How would you like the proposal to read with respect to an RFP number?

A5. 2022-RFP for Airport Property is fine.

Q6. Does the City have an architectural review board with specific architectural standards for buildings and site? If so, can we obtain a copy?

A6. The City Does not have an architectural review board. Per State law, we cannot deny building appearance as long as they meet the Building Code.

Q7. The site is comprised of three separate parcels. We assume we can treat the site as a single parcel for development. Please confirm.

A7. The Properties in question will need to be replatted into a single lot.

Q8. Will the City require the project to be LEED compliant or include any other environmental / energy requirements over and above good design practice?

A8. We have no restrictions as to LEED compliance. As long as the ICC Building and Energy Code, it is acceptable.

Q9. Under Section 11-9-3 it states that the City retains as Recommended Plant Material List (on file with the City). Could we obtain a copy of this?

A9. See attached

Q10. The code appears to allow a mixed irrigation system (Typical spray heads and low flow drip irrigation). Is there a preference of system design from a perpetual maintenance standpoint?

A10. The City accepts any design supplied by a licensed irrigation designer as approved by Texas Commission on Environmental Quality. We would obviously prefer low drip irrigation where it is usable, but we have no requirement.

Q11. Is re-use irrigation water available for this site and is it possible to confirm the maintained operating pressures? If re-use water is not readily available but may be in the future is it required to design the system to connect to the reuse lines in the future and all current design should accommodate typical re-use irrigation installation practices (i.e. use of purple pipe etc).

A11. Re-use water is not available from the City. If you want install a "gray" water system for the Hotel, it must be in compliance with the International Plumbing Code. There are no plans to require re-use systems in the future.

Q12. If re-use lines currently do not have constant maintained operational pressures to function properly, is it the desired intent to provide potable water as a source back-up until such a time that functional reuse pressures are maintained to provide full system functionality?

A12. As stated above, there are no re-use lines available, so the primary water source will be potable water through a separate meter for irrigation.

Q13. Are there any minimum recreational or open space design standards for hotels (i.e. pools, outdoor gathering space requirements etc)?

A13. There are no special requirements regarding open space such as pools or outdoor gathering space for hotels. We do require 10% landscaped area and we have tree requirements for frontage and parking spaces. A tree is required for every 30 feet of street frontage and 1 tree for every 15 parking spaces. In the airport area, we work with not planting trees that attract any avian population.

PLEASE RETURN THIS ADDENDUM WITH YOUR BID BY THE CLOSING DATE.

All other terms and conditions shall remain the same.
